Ladies and Gentlemen,

Throughout this time of uncertainty, it is remarkable to see the vital role our organization has, and how all of you make it possible to provide care for patients and families who are sick or concerned about getting sick.

While everyone has individual circumstances, we are navigating this challenging time together and relying on one another for support, kindness and strength. We are stronger together, and our community is counting on us. On behalf of the entire leadership team, thank you for your commitment to caring for our community. Please take a moment to [view this brief video message](#).

As we continue to follow guidelines from the Centers for Disease Control and Prevention, the Florida Department of Health and the Florida Hospital Association's infection transmission prevention precautions, we are providing you with the latest Baptist Health protocols.

Attached please find:

- Updated training material for the use of PPE, along with accompanying WINKs.
- Updated information regarding the extended and limited reuse of N-95 respirators and eye protection.

In addition, please note we will begin utilizing another model of N-95 respirators manufactured by 3M (model #8511). This N-95 respirator provides the same level of protection as the N-95 models from 3M and Kimberly Clark currently used in our facilities. Our Occupational Health Office reviewed and approved this model for use. The use of this new model will NOT require a new fit test for anyone who has already been fit-tested by our Occupational Health Office.

Please continue to read updates and visit the intranet for the latest information and resources for employees.

With respect and gratitude,

Bo Boulenger
Executive Vice President &
Chief Operating Officer

Dr. Mark Hauser
President, Medical Staff Affairs
