

COVID-19 Serology Antibody Testing

FREE FOR EMPLOYEES

Have you signed up to get a Covid-19 Serology Antibody test yet?

Since our announcement a couple of weeks ago, more than 4,100 employees have requested appointments to test for Covid-19 serology antibodies. More than 2,000 employees already know their results and another 1,000 are currently scheduled for appointments. If you have requested an appointment and have not been confirmed yet, please be sure to answer your phone, check your messages and/or return the Occupational Health team's calls, as the team has been actively reaching out to everyone, yet having difficulties reaching some employees.

Testing Details:

- The test reports IgG antibody status and is performed on the Abbott Architect – which is one of the highest performing serology tests available (sensitivity = 100%; specificity = 99.6%).
- The antibody test is just a quick blood draw. You will be in and out in less than 10 minutes.
- Test results will be provided to you within 3 days.
- No same day appointments will be given.
- If you do not show up to your scheduled appointment, you will need to submit a new appointment request.

If you have not requested an appointment yet and would like to do so, [click here](#). Please keep in mind that due to our commitment to respect social distancing guidelines, our collection events have limited capacity. We are on most hospital campuses at least once each week and we are committed to providing this testing to all employees who want it. So please be patient through the process, as we know it could take some time to get everyone tested.
